

<i>Proposal 1 (selected during the negotiation)</i>	
Site	Rozewie Cape. Moraine belt Cisowo - Zakrzewo - Kopnica - Drozdowo-Dzierzecin. About 3 km east north of Darlowo.
Wind Conditions	8 – 10 m/s; west-northwest direction
Soil Structure	Mixed clay/gravel/sand
Orientation of the Turbines	<i>Directly facing the wind</i>
Spacing between turbines	In the same sense as the dominant wind direction: 7 times the rotor diameter (301 m). Perpendicular to the dominant wind direction: 4 times the rotor diameter (172 m) Total surface of the wind farm: (Placement of the turbines in one line): 37 ha; 93 acres

Picture 1: Turbines spatial distribution placed in single line.
