

Wind Power Poland Proposal Award:

JELB Associates are very pleased to be announcing the Contract Award to **Euroblades (ESC Toulouse Team G).**

Three teams: **Euroblades, Sirocco (ESC Toulouse), and Design Build Associates (NCA&T)** came up with proposals and overall designs that were very good. The proposals were strong in the areas that were important to us. We carefully considered each of the proposals, comparing our needs to what was presented to us in the proposals.

During our teleconferences many issues that we had with the proposals were cleared up, making it even harder to choose a definite winner. It was great to work with all the teams. In the end, it was the little details which best suited our needs that shifted the balance towards **Euroblades.**

Unfortunately, we can only award the proposal to one team, and that team is **Euroblades.** We thank you all for the hard work and effort in delivering such excellent proposals.
